HOISTING MACHINERY. OTIS, BROTHERS & CO., (Successor to E. GRAVES OTTS,)

Original

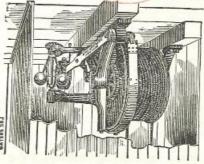

of the Safety Ratchet & other Safety & Economic Devices by which the Platform is instantly locked to the Guide Posts on the breaking of the Lifting Rope, and no power is consumed excepting what is actually required to do the work.

We are now manufacturing over twenty different sizes and adapta-

HOISTING MACHINERY

and are enabled by our long experience and thorough knowledge of the business to guarantee the most a unqualified satisfaction in all cases.

By the application of our PATENT

Self-Oiling Loose Pulley

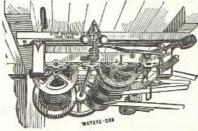

and also a very superior

Self-Oiling Journal

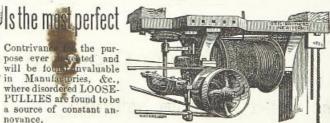

we can warrant our machines to run in the most perfect and satisfactory manner

With Oiling but once a week

ILING LOOSE

Contrivance the purpose ever related and will be found invaluable in Manufactories, &c., where disordered LOOSE-PULLIES are found to be a source of constant annoyance.

CIRCULAR! ADDRESS,

OTIS, BROTHE

307 BROADWAY, ---- NEW YORK CITY.

Manufactory at Yonkers, N. Y.

INTRODUCTORY.

The information contained in this work is arranged systematically, as follows:

1st. A Shipper's Guide to the cities, towns and villages of all the Southern and Western States, embracing twenty-three States named in the title page, embracing also special shipping instructions to inland towns.

2d. Shipping directions by Express throughout twenty-three States, giving the names of all companies connected with points named.

3d. A complete railway directory of the United States, giving the length of road, names of officers, names of terminus, &c.

4th. An extensive list of first class and desirable hotels in the United States.

5th. A list of steamboat and steamship lines in the United States.

6th. A list of the active and prominent Petroleum Companies of the United States.

7th. A complete telegraph directory to all the telegraph stations in the United States, officially compiled for this work.

8th. A special business register of prominent houses in the large cities of the United States, arranged alphabetically by towns, and in each town alphabetically by business headings.

The Publishers, in presenting this work to an appreciating and discriminating public, feel assured that an undertaking of so vast a nature (whose merits every business man will perceive at a glance) will receive a criticism conceived in a friendly and charitable spirit. The great aim has been to give to the commercial world a SHIPPER'S GUIDE, which would enable merchants and forwarders to transmit goods from the most distant sections of the country in the most available and convenient manner. For this purpose, we have taken infinite pains to give special directions to inland towns, having no direct communications by railroad or by water. Of these alone the number is immense, especially the South-Western States.

It was, of course comparatively easy to give shipping directions to railroad towns, but the great desid-

eratum in a Shipper's Guide is the feature above referred to.

Again, we have been careful to give the shipper by express the choice of companies, naming in connection with points reported, all the express companies connecting with that point. And again, we have herein presented a complete list of all the telegraph stations in the United States, derived entirely from official sources, and prepared expressly for us in the general office of the Western Union Telegraph Company in New York.

This is the first time such a list has ever been published, and we confidently claim that it is of itself

worth the subscription price of our book.

We desire to call attention to our very complete and admirable list of hotels in the United States. It is a late compilation, and will be found especially valuable to travelers and traveling agents. There are other features in our book which will severally secure a due commendation. We may say, in conclusion, that we have labored for years upon this work, and have spared neither expense nor labor in our undertaking. Errors have of course been unavoidable. We simply ask the indulgence of our readers. We intend to put in press, almost immediately, a second edition of our work, which, it is expected, will

We intend to put in press, almost immediately, a second edition of our work, which, it is expected, will appear during the present year. And as a compliment to the large number of appreciative advertisers whom we have the honor to present, we shall renew, in that edition, the entire regular advertising department of the book. Our canvass for our second edition will be for the purpose of securing additional advertisements, and new subscriptions and the canvass will extend over the entire United States. We have secured a large number of voluntary subscriptions, and we are proud to say that the enconiums we have received at the hands of the press and of business men generally are such as to afford the conviction that the Shipper's Guide will meet with a friendly reception and a circulation eventually that will place it in a majority of the counting-rooms of the country.

THE

Smith & Wesson

REVOLVERS,

Being adapted to Water Proof Metallic Catridges, are sure fire in any weather, and are not liable to be corroded by powder, though left loaded for any length of time. Being rifled by the most approved machinery, they shoot accurately and with great force. The hammer of the revolvers resting between the catridge heads renders them perfectly safe to carry. They are simple in construction and of elegant model; are not liable to get out of order, every part being made of the best material and subject to the most rigorous inspection.

EVERY REVOLVER IS FULLY WARRANTED.

During the past two years 200,000 of these arms have been sold in the United States, and after every variety of test they are universally conceded to be the very best.

Magazines, Sheet Music, Newspapers, Periodicals, Pamphlets, &c., &c., of all kinds.

Combining Security and Durability with Rapidity and Economy.

This article is designed for fastening papers of all kinds, temporarily or permanently, as may be desired.

The advantage which this mode of fastening presents over all others is as follows:

1st. It binds the paper firmly and securely, without fear of their coming apart or tearing out, as is the case with cyclets, ribbons, etc.

2d. It gives additional strength and support to the papers.

3d. It is easily applied, and as easily removed, without injury to the papers.

4th. It will bind from one to two hundred pages; by the aid of the Binding Strips, it can be made to bind one thousand.

5th. Ribbon and seal can be used with all the sizes, when required; the No. 1 size is, however, especially adapted to it.

6th. It presents a neat and ornamental appearance, and is so compact as not to interfere with the smooth folding of the paper.

Size of the Fastener.

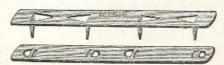

No. 1.

Two inches long, with two teeth and holes for ribbon and seal. Will fasten from two to thirty-five sheets, or four to seventy pages of heavy cap paper.

No. 2.

Two and seven-eighth inches long, four teeth. Will fasten from two to sixty sheets, or four to one hundred and twenty pages of heavy cap paper. For sealed documents, the ribbon is run through the hole made by one of the teeth and then fastened outside.

No. 3.

Three and seven-eight inches long. Will fasten one hundred sheets, or two hundred pages of heavy cap paper. No. 3 is used for binding SHEET MUSIC, and will bind books of one hundred and twenty pages each. Three Fasteners applied to the back will give a firm support and preserve the music. It has the advantage of a permanent or temporary binding. Small boxes are put up for this particular use, and may be had at the Music Stores and Stationers.

Cutting Tools and Hammer.

The Cutting Tools are made of three sizes, to correspond exactly with three sizes of the Fasteners. One size of hammer will answer for all.

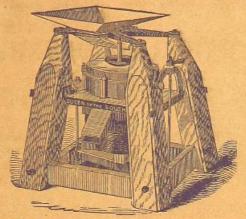

Lever Press, also used for Applying the Fastener.

SOLD BY STATIONERS GENERALLY.

CORHAM MFG. CO. PROVIDENCE, R.I.

THE CORHAM MANUFACTURING COMPANY inform the trade that they are producing fine

Electro-Plated Goods,

Dinner and Tea Services and Table Ware

of every description of a very superior quality, and of new and elegant designs. The base is Nickel Silver, upon which is a deposit of Pure Silver of such thickness that they possess all the advantages of solid silver in utility, and for beauty of design and superior finish are undistinguishable from it.

The Gorham Manufacturing Company refer with confidence to the high reputation they have estab-

lished in the production of

SOLID SILVER WARE,

in which they have been for many years engaged, and they now assure the public that they will fully sustain that reputation by the production of

Electro-Plated Wares,

of such quality and extreme durability as will insure entire satisfaction to the purchaser. All articles made by them are stamped with their trade mark, as above, and all such are fully guaranteed. They feel it necessary particularly to call the attention of purchasers to the above trade mark, as their designs have been already extensively imitated and cheaply plated. These goods can only be procured from responsible dealers throughout the country.

CAUTION:

Since these goods were presented to the public, they have been so favorably received that samples are sent abroad and copies of them are being made to a considerable extent by English manufacturers, and though cheaply plated and not finely made, are nevertheless well calculated to deceive the purchaser, as they are being imported by respectable houses. It behooves those therefore who do not wish to be deceived, to ascertain before purchasing that the goods are stamped with the above Trade Mark.

PRICE, EIGHTY DOLLAR.

CHEAP,

Strong,

WEAVES

All Kinds of

CLOTH

THE BROWWELL HAND LOOM.

PATENTED JAN. 19, 1864. BY JOHN G. GARRETSON,

The cost of the Loom, with Steel Reed, Harness, Shuttle, Lease Rods, Temples, Wrench, Quilt Spools, and Quilling Apparatus, complete and ready for operation, is only

EIGHTY DOLLARS,

The whole upper rigging, in use in all other Looms, is done away with, and there is no gearing or complicated Machinery to consume, by friction, the power applied at the lathe. The Loom is so simple and easily worked, that

A Child Can Weave from 20 to 40 Yards per Day.

It is easily adapted to woolen or cotton warp, and it will weave any description of goods that can be woven on any Power or Hand Loom; as, for instance, Jeans, Satinet, Linsey, Double Plain Tweed. Diaper, Herring Bone, Blanket Twill, Bird's Eye, Honey Comb, Fancy Twill and SEAMLESS BAGS. The change from any one of these to any other can be made in a moment, without any change of the drawing in.

A 40 inch Loom will Weave an 80 inch wide Sheet or Blanket.

No. 1.

No. 2.

No. 3.

No. 1 is a cut of the Hydrant one-eighth size. No 2 is a Sectional View of the Hydrant one-eighth size.

No. 3 is the full size of the Valve in the Oylinder.

1st. It has a neat Iron case, made in Sections, the bottom cast on, which closes around the Cylinder, and forms a Base for its support, and holds it in position.

2d. The Cylinder is made of Brass, the Discharge Pipe Lead. with a Brass Nozzle, which screws to the Case permanently. 3d. The Valve is so arranged that it can be removed from its

base and returned again without the least trouble.

4th. The Hydrant is so constructed, that the induction-pipe can

be changed from front to back, by opening the case and turning the Cylinder.

5th. By the construction of my Valve, which is shown in the cut, you can draw water under any pressure without jarring the pipe. 6th. The Hydrant is operated by pressing the crank to one side, when it will run until it is returned to its former position, when the water will be cut off, and that in the discharge-pipe return to the Cylinder below the frost.

In case of REPAIRS becoming necessary, the operation is very simple, as follows:

1st. Draw the wire pin from the crank in the inside, at the top, remove the screws that hold the handle, draw it out from the ease, then lift out the plunger.

21. Insert the wrench and unscrew the Valve, then reverse the wrench and lift out. When repaired, replace it in like man-

By reference to the cut it will be seen, that the Valve stem has a button on top, by which it can be lifted out with the prongs on the small end of the wrench. Also, that the threads are turned off from bottom of Valve nut. acting as a guide, by which means the workman can replace it without difficulty.

HIGHLY IMPROVED

ORGANS AND MELODEONS.

NEW HAVEN, CONN,

Particular Attention Paid to the Orders of Music Dealers.

GEM ORGAN, Patent Design, Single Reed, Five and Six Octave, Double and Single Bass.

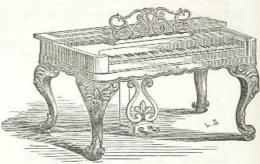

Noiced With

A-
RICH,

MELLOW

-AND-POWERFUL

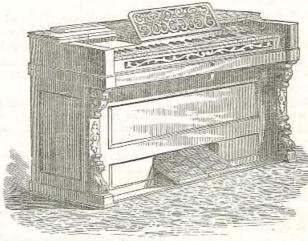

TONE

Five and Six Octave Carved Legs Piano Melodeon, combining all the latest improvement.

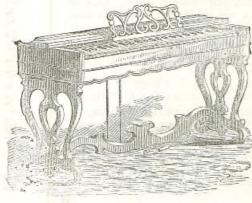

Gem Organ.

An Instrument every Music an should have, and no family should be without. In intro using the Gem Organ, we shall endeavor to make it a Gem in reality, as well as name, combining all the sweetness of the flute with the most surprising, gradual increasing power of a large Pipe Organ, and for Public Halls, Churches, Schools and Parlors, we claim there is no instrument that will take the place of the Gem Organ.

The great aim has been to manufacture an Organ of perfect proportions—to please the eye and satisfy the ear—possessing great power, with sweetness and flexibility of tone—as ready to respond to the touch as a Piano. The cases are highly ornamented in external finish, and none but the very best materials are used, and warranted to give satisfaction.

Five and Six Octave Gem Organ, from one to six setts of Reeds, with 2 oct. pedals, sub bas, &c., expressly adapted for Churches, Halls, &c.

Five and Six Octave, Portable Melodeon.

The superiority of our Instruments consist—

- 1. Equality of tone.
- 2. Body and fullness of tone
- 3. Eveness of tone.
- 4. Promptness to touch.
- 5. Elasticity of touch.
- 6. Style of finish.
- 7. Durability.
- 8. Quality of stock.

Five and Six Octave, Plain Piano Melodeon

JOSEPH W. WAYNE,

Sole Manufacturer for the West and South, of

Schooley's New Patent, Self-Ventilating

AMERICAN REFRIGERATORS!

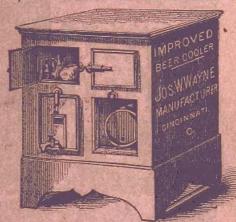

Which are the only Perfect Self ventilating Preservers known. They produce a UNIFORMLY COLD and DRY ATMOSPHERE, which enables them to keep Vegetables Fruit, Meat, Fish, Milk, Butter, Eggs, &c., &c., LONGER, WITH LESS ICE, than any other REFRIGERATOR in use; and they are, undoubtedly,

THE BEST IN THE WORLD!

They are made of all Sizes, and various Styles; adapted for the use of

FAMILIES, HOTELS, STEAMBOATS, GROCERS & BUTCHERS.

I ALSO MANUFACTURE

COMMON ICE CHESTS OF EVERY DESCRIPTION,

IMPROVED

BEER COOLERS

PATENT WARDROBE BATHING APPARATUS,

(A New and most Convenient and Useful Invention.)

SHOWER BATHS,

O. RICE'S PATENT

Zinc Washboards, and Patent Double-Bottom Coal Buckets.

PORTABLE HOUSES, DOORS, SASH, OUTSIDE & INSIDE VENETIAN PIVOT & PANEL SHUTTERS.

Store Doors, Door and Window Frames, Mantles, Moldings, Stairs, Newels, Banisters, Brackets, Cornice, Base, Architraves, Verandahs, Porticoes, Store Fronts, Counters, Balustrading, Palings, Flooring, Shelving, Weatherboarding, Fencing, &c.

Keep Constantly on Hand a Large Stock of

WHITE AND YELLOW PINE FLOORING,

ALSO, CONTRACTORS AND BUILDERS.

The old firm of Mills & Spellmer will continue the Building business as heretofore, under the firm name of Mills, Loud-

HEAD & Co., at the above named place of business.

We have attached to our Factory a HOT AIR DRY HOUSE, where all of our work is placed and properly proved before it is glued up, thereby removing any dampness that may be in the wood, and thus preventing any possible chance of shrinkage and opening of joints

after the work is finished.

Particular attention is called to our new book, containing four hundred and ninety-five illustrations, viz: Plans of Dwellings, Moldings, Architraves, Base, Brackets, Cornices, Stairs, Newels, Bunisters, Rails. Mantels, Window Frames, Sash, Doors, Columns, Verandahs, &c. This is the best work of the kind ever got up, and will be sent to any address on receipt of 50 cents in stamps or currency.

Young Ladies' Institute.

H. THANE MILLER, Pres't.

This School has just concluded its tenth year. Its history has been one of prosperity and growth since the commencement. The last two years the daily average attendance has been more than two hundred, and many have been refused admittance for want of accommodation.

NEW BUILDING

Is now under contract, to be ready for occupancy at the opening of the Fall Session, in September, and it is hoped that hereafter all can be received as pupils who apply.

The Library, Apparatus and Cabinet are receiving yearly valuable additions, and the purpose is kept steadily in view to furnish every facility for a thorough course of instruction.

The Faculty consists of four male and eleven female teachers, all experienced instructors in their covered departments.

their several departments.

The School is fully graded from the Preparatory Department through the entire course of Academical and Classical studies.

For particulars and catalogues, address H. THANE MILLER, President, or I. H. WHITE, 25 West Fourth street, Cincinnati.

Our BITTERS are literally what the title proclaims. It is Southern in its devisement, upheld by Southern capital, and especially adapted to certain types of Southern Diseases. It is not designed in this statement to appeal to any proscriptive, sectional feeling, but to invoke that honorable sentiment of local pride which seeks a footing of entire self-dependence.

This Tonic is the offspring of long and careful study of our climatic influences upon the human system. Our effort has been to effect a combination which would combat with success, The Nervous Debility, The Dispersia, The Stomach Derangements, &c., which spring so fauitfully from our hot summers and poisonous miasmas.

The steady chorus of applause which reaches us from every quarter to which our BITTERS have been sent, authorizes us to announce, that our effort has not miscarried, and that we offer a Tonic which addresses the palate seductively, and applies to the disease with a specific potency.

MORGAN LINES United States Mail Steamers.

NEW ORLEANS AND TEXAS PORTS. Sabine Pass, Galveston, Indianola, Lavaca, and Brazos Santiago.

These Lines are maintained by the following First Class New Iron Low-Pressure Steamships, constructed expressly for these routes, and are well known for their Regularity and Safety:

Morgan, Clinton, St. Mary. J. C. Harris, Austin, Harlan, CRESCENT, MATAGORDA, W. G. HEWES, ALABAMA.

The Departures from New Orleans are as follows. For Galveston, Indianola, Lavaca, tri-weekly, via the River, carrying freight and passengers. For Galveston, tri-weekly, alternate with the above, via Opelousas railroad—Berwick's Bay Route—carrying Passengers only. For Sabine Pass, weekly, via Opelousas railroad, Freight and Passengers. For Brazos Santiago semi-monthly via the River, for Freight and Passengers.

These Steamships are now in connection with the

New Orleans and Mobile Daily Packets,

Comprised of the following First Class Iron Low Pressure Steamers,

MARY, FRANCIS, LOUISA.

Making daily trips between New Orleans and Mobile, connecting at the latter port with Railroads and Steamboats for the interior, carrying freight for Selma, Montgomery, and all points on the Alabama River.

The above steamers carry the United States Mail, under special contract with the United States Government.

Freights taken at very reasonable rates. All goods consigned to the undersigned will be promptly forwarded to any of the above points, free of all charges in New Orleans, except drayage or actual outlay. For further particulars apply to

J. C. HARRIS,

Agent Morgan Line.

MENDENHALL'S SHIPPING ATLAS

-OF THE-

SOUTHERN AND WESTERN STATES.

This work is the handiest and most convenient of the kind ever published. It contains a fine map of the Express routes of the Western States, every route being distinctly marked in colors. Also, a Railway and County Map of the Southern States. Also, separate Maps of each of the following States:

Ohio, Indiana, Illinois, Iowa; Missouri, Kansas, Kentucky, Tennessee, and a Map of the States of Arkansas, Mississippi and Louisiana.

These Maps are 18 by 24 inches, folded into a quarto case of a size convenient for the Shipping Clerk's Desk. They exhibit the Cities, Towns, Villages and Stations in each State; the Railways, Rivers, Canals, Roads, &c.: &c. Price of the Atlas, strongly bound and lettered on side, \$5 00. Sent free by mail on receipt of the price. Maps of all Publishers for sale.

THE EVENING TELEGRAPH,

Published Every Afternoon, (Except Sundays,) No. 108 South Third Street. - - - - PHILADELPHIA, PA.

Has the largest circulation of any Evening Paper in the United States; contains all the News of the Associated Press and the European and United States Telegraph Co. up to 5 o'clock P. M., with special reports from Washington and every leading News Centre North and South.

THE EVENING TELEGRAPH

Also contains the Leading Editorials from the New York Herald, Tribune Times, World and the New York Daily News of the same morning. Its original matter, consisting of Editorials, Local News, Reports, Markets, Financial Reports, Stock Reports, is interesting and reliable. In every Saturday's Edition is published an original illustrated humorous article on local subjects, entitled,

"OUR SATURDAY NIGHT SUPPER TABLE SERIES."

Another Leading Feature of

TELEGRAPH THE EVENING

Consists of lavish and copious Literary Articles selected from the Leading English Monthlies and Periodicals, such as "Temple Bar," "Cornhill Magazine," "All the Year Round," "Once a Week," "St. James' London Society," "Leisure Hours," and "Belgravia."

TO ADVERTISERS.

The circulation of the EVENING TELEGRAPH, besides being greater than any other Evening Paper in Philadelphia, extends to all of the Towns and Cities adjacent to the City.

ADVERTISING AGENCY.

ESTABLISHED IN 1852.

This Agency presents a convenient and complete opportunity for publishing Advertisements in any number of the best and most widely circulated Newspapers of the different Cities and Towns throughout the whole Country, at the publishers lowest rates, with the least possible trouble to advertisers, and with the greatest dispatch. Through this Agency, a circumspect and discriminating choice of places, and the best selection of papers, can be had, suitably adapted to various business pursuits, enabling persons to advertise judiciously, effectively, and safely. The advertising business receives my constant personal attention; hence I can guarantee entire satisfaction to my patrons. The papers will be regularly on file in my office.

Call on, or address,

THE OLDEST AND SAFEST

EXCLUSIVE ACCIDENT INSURANCE CO.

THE ACCIDENT INSURANCE COMPANY OF COLUMBUS, O. CAPITAL, - - - \$1,000,000.

Registered General Accident Policies, covering all manner of Accidents, whenever and wherever occurring, are issued at the Lowest Rates charged by any Responsible Company, and for any length of time, from one month to one year, renewable at pleasure.

Policies are Issued for from \$500 to \$10,000,

Payable in case of Death with Weekly compensation of from \$5 00 to \$50 00 per Week,

In case of accident causing disability, preventing attention to business or occupation.

The cost of a yearly policy or ordinary risk is at the rate of only

Five Dollars for One Thousand Dollars.

The amount paid as premium is returned every week in case of disability, as long as the disability lasts, even should it be half a year.

Thus, Ten Dollars per annum paid to the Company secures Ten Dollars per week while disabled by any accident, and Two Thousand Dollars in case of death.

IT IS ONE-FOURTH THE PRICE OF LIFE INSURANCE!

It pays weekly benefits when you are disabled by accident.

If fatally injured, it pays your family a sum sufficient to maintain them.

Advanced age does not increase the premium.

No medical examination is required before obtaining a policy.

A policy can be issued in five minutes time.

YEARLY POLICIES ARE THE SAFEST CHEAPEST & BEST.

GEO. B. WRIGHT,

D. S. GRAY,

E. H. DENNIS.

ERNEINNATI, O.

SAFE INSURANCE AGAINST ROBBERY & FIRE! HALL'S PATE

Combination Bank Lock. "Victor"

The superiority of this Lock consists of Several new and important features:

1. It has changeable INDEX COMBINATION KEY, but no KEYHOLE.

2. This index Key operates outside upon a conteal-shaped, handened Steel Arbor or Revolving Shaft which moves the interior in conformity with the adopted combination.

3. This hardened steel-sheel Arbor, or Revloving Shaft admits of no drawing out so as to suffer its being broken off and thus prevent the owner from unlocking it at pleasure.

4. The Arbor or Shaft is flush with the face of the door. Its control or Wedge shape renders it impossible to be driven in; its projecting shoulder within prevents the possibility drawing out beyond the face of the door; hence the social breakings from outsiders. It is inite of no possibile movement save revolving upon its axis. In conclusion, WE CHALLENGE THE WORLD TO PICK IT!

1. It wintle all to call and examine the Safes before purchasing elsewhere.

ERECTED BY

WM. E. WOOD & CO.,

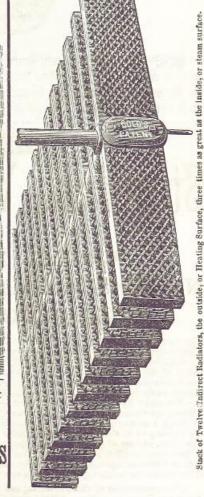

369 West Baltimore Street,

OPPOSITE THE EUTAW HOUSE.

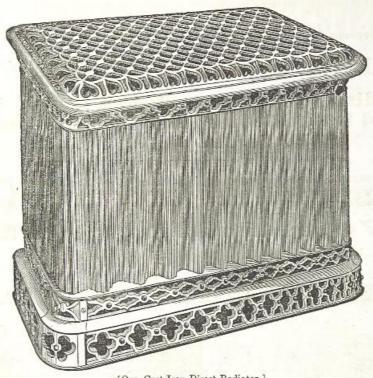

BALTIMORE, MD.

Persons at a Distance wishing Estimates, will please send Plans of Building including the length, width and hight of different rooms and halls, and Location of flues.

[Our Cast-Iron Direct Radiator.]

Our Patent Cast Iron Direct Radiator is a new article, which is rapidly supplanting the use of Pipes. It radiates heat far better, is not liable to leak, and being more durable as well as Ornamental, will be found very desirable for Factories, Depots, Hotels, Steam Vessels, &c., and can be applied with edual facility to Live or Exhaust Steam.

Steam and Water Heating Apparatus,

AS ERECTED BY

No. 369 West Baltimore Street, - - - BALTIMORE, MD.

THROUGHOUT THE UNITED STATES,

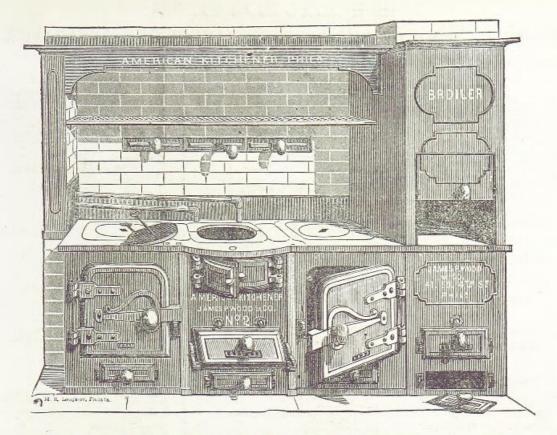

Has been brought to such a state of perfection that we can confidently recommend it to all who desire to have the PURE out of door AIR brought into their apartments (whether in dwelling-houses or public buildings) sufficiently warmed for the coldest weather, without being injured by contact with intensely heated surface. We use no pipes nor coils requiring steam at high pressure, but by a combination of the two modes of heating (hot water and steam) secure the best qualities of each, viz: the uniformity and endurance of the nor-water surface with the expansive power of STEAM, able to multiply itself to any extreme of temperature. All this with an apparatus easily managed, which cannot explode, economical in fuel, and so constructed as not to require repairs in many years.

The entire Apparatus is located in the basement, or cellar, where fresh, pure air from outside is warmed, and thence conveyed into the different apartments. The Steam Generator, or Boiler, is made of Cast Iron, in separate sections, each a complete Boiler in itself, so that by using a greater or less number of these sections, the capacity of the Boiler will be increased or diminished, to adapt it to the size of the building to be warmed. From the Boiler the steam is conveyed to our Patent Radiators, or Warming Surface, which are also made of Cast Iron, and are of peculiar construction. The peculiarity consisting in increasing the external surface to about three times the extent of the inner, the effect being to reduce the heat, and thus impart to the atmosphere a soft and genial warmth without destroying the moisture, or otherwise injuring it. Thus fully complying with all the requirements of a perfect system of ARTIFICIAL WARMING, and at the same time furnishing the requisite amount of heat to accomplish the desired end.

The construction of this apparatus, and its action on the atmosphere, produce a circulation which renders the ventilation complete and the warming thorough.

The construction of this apparatus, and its action on the atmosphere, produce a circulation which renders the ventilation complete and the warming thorough.
The construction of this apparatus, and its action on the atmosphere, produce a circulation which renders the ventilation complete and the warming thorough.

That our success has been complete, and entirely satisfactory to our patrons is shown by their testimony, and we ask attention given our Apparatus, of superiority in its simplicity and economy of operation, in its superior ventilation and equality of heat; in its entire freedom from gas and all unpleasant qualities, (which makes it most acceptable to invalids) in its freedom from the liability of having the heat th own back from parts of the house by the variations of the current of air outside, and its uniform and great flexibility, meeting the requirements of mild weather by its hot water surface, without much steam, and of the coldest weather by the two combined.

WE PARTICULARLY RECOMMEND OUR

American Kitchener Range,

OF FIVE DIFFERENT SIZES, WITH OR WITHOUT BROILER,

As the Best in the Market and Warrant them in Everything that Constitutes a Perfect

COOKING APPARATUS WITHOUT EQUAL!

OUR HEATER AND KITCHENER RANGE

Can Both be seen in full Operation at our Office,

Pacific n10]

OVERLAND MAIL, EXPRESS & TELEGRAPH LINE.

MOUNTAINS THE

On and after March 1, 1867, the Union Pacific Railroad will run

PASSENGER BETWEEN OMAHA AND NORTH PLATTE.

The Completion of the Chicago and Northwestern Railway to the Missouri River (the trains of which run in direct connection with those of this road), makes an ALL RAIL ROUTE, and only ONE CHANGE of cars from Chicago to North Platte, where DIRECT CONNECTIONS are made with Wells, Fargo & Co.'s Overland Mail and Express Coaches for DENVER, SALT LAKE, and all points in COLRADO, UTAH, IDAHO, MONTANA, NEVADA and CALI-FORNIA.

The equipment of the road is complete, being all new and of first-class manufacture. Sleeping cars run on all night trains. Good eating-houses at convenient points on the road.

Passengers crossing the Plains will SAVE 200 MILES STAGING AND 48 HOURS TIME by taking this route.

Especial attention will be paid to the transportation of machinery and all freights to and from the Mountains.

Transportation companies prepared at all times to transfer freight from the terminus of the road to any point in the Territories.

This being the SHORTEST AND MOST DIRECT ROUTE, rates for both passengers and freight will always be AS LOW, TIME QUICKER AND CHANGES FEWER than by any other route.

SAM'L B. REED.

Gen. Superintendent,

A. A. BEAN, W. SNYDER,

Master Transportation. Gen. Ticket & Freght Ag't.

PARKER SEWING MACHINES.

Saleshoom,

No. 106

Tremont St. BOSTON.

MASS.

No. 6, Plain.

Samuel W. Hodges, Agt.

The Parker Sewing Machine, as represented in the cuts above, has now been before the public for ten years; and the following facts having been domonstrated are given as reasons why they should be preferred to any other:

- 1. They are so remarkably simple in their construction, a child of fourteen can operate them, and understand the mechanism.
- 2. They are the strongest and most substantial Family Sewing Machine now in market. It is almost impossible to break or get them out of order.
- 3. The Machines are made in duplicate throughout, the same part being exactly alike to every machine, so that should any part become worn out by use, or accidentally broken, it can easily be replaced.
 - 4. They are sure in their operation; they work in a uniformly perfect manner.
 - 5. They stitch, hem, fell. run, bind and gather, without basting.
 - 6. They sew equally well the lightest and heaviest fabrics.
 - 7. They sew over the heaviest seams without changing the tension or breaking the finest thread.
 - 8. They use any No. of Cotion Thread directly from the spool.
 - 9. They use a straight needle; curved ones are liable to break.
 - 10. The needle has a perpendicular motion. This is absolutely necessary for heavy work.
 - 11. They run easily, and are almost noiseless.
 - 12. They are not liable to oil the dress of the operator.
 - 13. They do not require any tools to set the needle.
 - 14. They do not have to be taken apart to oil or clean.
- 15. They are capable of doing a greater range of work, and in a more perfect manner than any other Sewing Machine.

We, therefore, with confidence, recommend this Machine to every Family, knowing it will do all it promises; and, as a further inducement, it is offered at a lower price than any other good machine sold in Boston.

The No. 1 Machine is particularly adapted to Families. They are light, and consequently easy to handle, while its parts are all strong enough for any Femily Work. The No. 6 Machine is somewhat larger in its construction and heaver, and is capable of doing any kind of heavy cloth work. No machine ever sold in this country is better adapted to the wants of the people, in every particular, than the Parker Machine. The usual discounts made to agents. Apply as above.

Samuel W. Hodges, 106 Tremont street, Boston, Mass.

MENDENHALL'S SHIPPING ATLAS

OF THE

SOUTHERN AND WESTERN STATES.

This work is the handiest and most convenient of the kind ever published. It contains a fine map of the Express routes of the Western States, every route being distinctly marked in colors. Also, a Railway and County Map of the Southern States. Also, separate Maps of each of the following States:

Ohio, Indiana, Illinois, Iowa, Missouri, Kansas, Kentucky, Tennessee, and a Map of the States of Arkansas, Mississippi and Louisiana.

These Maps are 18 by 24 inches, folded into a quarto case of a size convenient for the Shipping Clerk's Desk. They exhibit the Cities, Towns, Villages and Stations in each State; the Railways, Rivers, Canals, Roads, &c., &c. Price of the Atlas, strongly bound and lettered on side, \$5 00. Sent free by mail on receipt of the price. Maps of all Publishers for sale.

GORDON'S FRANKLIN JOB AND CARD PRESSES.

Description of the Franklin Card and Job Presses.

The Franklin Presses have been greatly improved in strength, simplicity and Beauty, and are not inferior in any respect to any Job Presses Manufactured.

The bed faces the operator and vibrates from its point of receiving the inking rollers to the impression. PATENTED.

The face of the platten stands at an angle from a horizontal position, when the impression is given, and rocks to and from such impression. PATENTED.

The platten is brought into a horizontal position, with its face upward, and has a period of rest given to it, while receiving the sheet to be printed. PATENTED.

The sheet is relieved from the type by grippers, gripping upon the rocking platten. PATENTED.

The Net Cash Prices Are

Half Medium Franklin, 13 by 19 in. inside of chase, \$550: with Fountain, \$25 extra. Boxing \$10.

Quarto "Improved, 10 by 15 in. inside of chase, \$425: with Fountain, &c., \$25 extra. Boxing \$7.

Eighth "Enlarged and Improved, 7 by 11 in. inside of chase, \$250. Boxing \$6.

One Roller Mould, Two Sets of Roller Stocks, Three Chases, are included with each Press.

DEPOT

No. 96 Fulton Street, - - - NEW YORK.

TAKE NOTICE—These Presses will all be thoroughly tested and boxed in the most substantial manner, and delivered in the city of New York, to order of the purchaser. MANUFACTURERS OF

Single and Double Cylinder and Type Revolving

Printing Machines

POWER PRESSES, Adams' Patent.

WASHINGTON AND SMITH HAND PRESSES, SELF INKING-MACHINES, ETC.

R. Hoe & Co.'s New Single Large Cylinder Hand Printing Machine.

The demand for a machine adapted to the wants of newspapers with small circulation has induced us to complete one to answer these requirements.

The above cut represents such a machine: it is intended to be driven by hand-power, and will print from eight hundred to one thousand impressions per hour. It can be arranged, if required, to be driven also by steam power. The speed can then be increased from one to two hundred impressions. It has registering apparatus, self-acting sheet-flyer, and iron bearers. Weight, boxed, 6,500 pounds.

Size of bed, inside bearers, 31 by 43 inches, price	\$1600.00
Roller Moulds extra price	12.00
Drjving Pulley, Tight and Loose Pulleys, Counter-shaft and two Hangers, for s Cone Pulleys price	40,00
Boxing and carting price	80.00

R. HOE & CO.

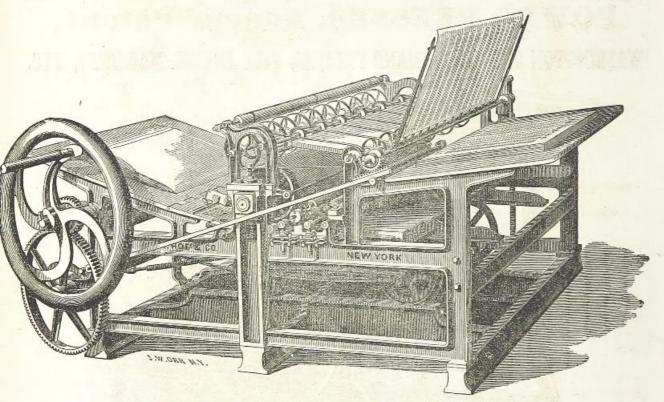

Manufacturers of

SINGLE AND DOUBLE CYLINDER AND TYPE REVOLVING

PRINTING MACHINES,

POWER PRESSES, Adams' Patent.

WASHINGTON AND SMITH HAND PRESSES, SELF-INKING MACHINES, E

R. Hoe & Co.'s Railway Newspaper Printing Machine.

This press is especially designed to supply Newspapers of moderate circulation with a cheap and plain, but serviceable Printing Machine, capable of doing also the ordinary Job Work of a country office. It is designed to run exclusively by hand, at a speed of 700 or 800 impressions per hour, and at this rate will work without noise or jar.

The bed is carried by a truck having large friction rollers running on a Railway (whence the name of the press), and is driven backward and forward by a crank motion which stops and starts it so gently that the bed-springs, usually employed, are not needed. The paper is fed through adjbstable guides to the under side of the impression cylinder, instead of the upper, and the feed board lifts the sheet up over the guides and against the cylinder as the fingers of the latter clasp it. After an impression is given, the impression cylinder remains stationary while the bed returns; a fresh sheet is in the meantime laid on the feed-board, and the fingers close on it before the cylinder starts again. As the cylinder wheel gears directly into a rack on the side of the bed, excellent register is obtained without a pointing apparatus. It has also a pointing apparatus. The bed is provided with iron bearers to equalize the impression on the form. The impression cylinder is never shifted to suit forms of different sizes, but the forward edge of the type is always placed to the same line on the bed, and the fingers and fly tapes are as easily adjusted as on our ordinary job presses.

The ink fountain has the adjustable knife so necessary to job work. The bed is 31x46 inches; a form 27 1-2x42 inches is inked by one roller, and a form 23x42 inches by two rollers. The press has our self-acting sheet-flyer, and can be run easily and safely by one man or strong boy at the speed mentioned above. It occupies a space 5 1-2 x10 feet, and can be worked in a room seven feet high. Weight, boxed, 5,600 lbs. Each machine is furnished

with blanket, and extra stocks.

E D M A N D S & H A M B L E T SOLICIT ATTENTION TO THEIR

Magneto-Electric Alphabetical Telegraph,

which requires NO VOLTAIC BATTERY, or any other motive power, beyond that which is generated within the instrument itself; and which, being independent of any separate voltaic battery to work it, requires no EXPENSE EXCEPTITS FIRST COST.

It is particularly adapted for ordinary distances of communication between offices and factories, counting-rooms and warerooms, police stations, etc. The instrument is all contained in a case not over one foot square; it is, therefore, easily managed, and will always be found ready for operation, not being liable, under ordinary care, to get out of order. To operate it, no knowledge of the usual telegraphic signs or sounds is requisite-the operator simply places his fingers upon the letters of the English alphabet, which compose the telegram; and the person receiving it simply takes notice of the letters, as they are successively pointed out on the receiving-dial at the other end of the line.

It may be arranged to be impelled by clockwork, foot-power, or by hand, in which latter case it is portable, and therefore not so necessarily confined to a permanent location as other electric telegraphic instruments.

SEEDSMEN & FLORISTS, HORTICULTURAL HALL, BOSTON.

Would call the especial attention of all who cultivate a Garden to their unrivalled collection of Vegetable and Flower Seeds, being the largest assortment ever presented to the public of the United States of our own raising, or imported direct from the leading seedsmen of Europe, to which is yearly added every thing that is new and choice. To all we would recommend our Amateur Guide to the Flower and Kitchen Garden, containing a list of all

seeds worthy of cultivation, embracing over 2,000 varieties with full and explicit directions for cultivation. A descriptive list of over 125 varieties of the finest French Hybrid Gladiolus, also plans for laying out Gardens on a scientific principle. The whole work comprises 130 pages, fully illustrated with a beautiful colored plate and cover, 50 engravings, and mailed free of charge. Our Plant Catalogue is issued in April and contains a list of Green-house Bedding and Herbaceous Plants, Roses, Vines, &c., free for 10 cents.

Our Bulb Catalogue is published in September, containing a list of Hyacinths, Tulips, &c., with directions for cultivation free for 10 cents.

THE HOUSEKEEPER'S FRIEND.

C. W. ALLEN'S PATENT

Safety Smoothing Iron Stand,

Patented February 28, 1867.

By this contrivance the sad Iron is secured to the stand, and the stand to the side of the Ironing Table, the PREVENTING ACCIDENTS by the falling of the Iron upon or from the Table.

The arrangement consists of a Guard, or Rim which holds the Iron in place, and a Clamp and Thumb Screw, fixing the stand firmly to the edge of a Table or Shelf, in the exact position most convenient for use.

It is also adapted for Tailors' use and is destined to find a place in every Household. Manufactured by the Patentee,

C. W. ALLEN,

NEWPORT, · · · · KY.

Hardware Dealers and Dealers in Aousekeepers Goods, are invited to send for a Circular.

Coffee Roasters.

The cost of Pure Coffee can certainly be diminished more than one-half, by saving the time and labor ordinarily spent in roasting it, by saving the aroma, the sole value of coffee, roasting it evenly, so that no kernel is wasted; by roasting it in hot air, so that none is destroyed by burning; by cleansing it from all impurities. All this, and much more is done by the **Self-Stirring Coffee Roaster**. No family can afford to be without it. Wholesale Shipping and Commission Merchants, and all others interested in Foreign and Domestic Trade, will find it well worth their while to examine this valuable invention. For sale by the

Fire Extinguishers.

FIRE! FIRE! FIRE!

DELAY MAKES THE DANGER. The Extinguisher, a self-acting, portable Fire Engine, is inexpensive, and so simple in its construction that the mere turning of a cock puts it into full action. Warranted harmless to life, health, and

property. Always ready for instant use. For manufactories, warehouses, railway depots, public buildings, hotels, and private residences, it is indispensable, and for steam and sailing vessels it is as vitally necessary as a life-boat or a life preserver. It occupies but little space, contains a chemical liquid, perpetually renewable, and is equally efficacious at any lapse of time.

Machine Belting Manufacturers.

BOSTON BELTING COMPANY.

Incorporated, 1845.

Original manufacturers of machine belting, steam packing, and engine hose.

Being made of heavy cotton duck-coated with the best of India rubber, is superior to leather, and less expensive. Being unaffected by moisture or the atmosphere, and is preferred to that of any other manufacture for saw mills, flouring mills, elevators, gin-bands, agricultural machines, and other mechanical purposes. India rubber hose, of all sizes and of superior quality, suitable for conducting and hydrant purposes, and for leading and suction hose for fire engines. Steam-packing, prepared to stand a high degree of heat, is used in preference to any other article by the most skillful engineers and machinists for manhole-pits, piston-rods, steam-joints, steam-chests, cylinder-heads and stuffing-boxes, and for all parts of machinery where packing is necessary.
